OUR SERVICES

Web Design & Development

Are you looking for a custom, unique and professional web design services and solutions in Lebanon, Saudi Arabia, UAE (Dubai, Abu-Dhabi), Qatar, Kuwait or France? We follow the web standards to make your project maintainable and →scalable.

Since the web page design gives the first impression to the visitors of a certain website, it is essential to maintain a positive image in the mind of the visitor. This image is created by the perfect placement of graphics and color schemes in the webpage.

Our highly dedicated team, which constitutes of a group of specialized individuals who are passionate, committed, and punctual, makes sure that your website is unique and original, and expresses your own identity, stands out from those of your competitors, user friendly, reflects your own vision and perspective, and contains numerous "Call to Actions" that are reasons for customer to Buy, Call or give you their Name and Phone Number).

Social Media Plans

If you are searching for social media marketing and management that will engage and expand your audience across the web, then you have come to the right place. Multiframes will help you build a solid brand by creating and implementing the right social media strategy that targets influencers in your niche market, increases word of mouth referrals and makes sure your brand or business stay on top of the conversation in your industry.

For your business to thrive, you need to introduce your company and products to the internet, the broadest media in scope; that is our responsibility at Multi-frames. With Web Marketing you can reach a wide range of targeted audience, and yet be cost effective.

Our web marketing services include Google Adwords, Search Engine Optimization (SEO), Social Media and Banners.

Software Development

No matter the nature of your business Multiframes makes your life easier by allocating the best software development teams to help you develop and organize your business in no time.

SEO (Search Engine Optimization)

With more than 1 billion regular internet users around the globe, and at least 72,000,000 individual domain names in current usage, the World Wide Web relies heavily on search engines to direct traffic to the products and services web users are looking for.

The leading engines alone, Google, Yahoo, MSN/Live, AOL and Ask, deliver more than 10 billion search results per month to web users worldwide.

Our expertise lies in search engine optimization, linking strategies and promotion of web sites to deliver them to your door.

Web Hosting

Web hosting; that is the process of making your website accessible, is not something you can easily achieve. Web hosting services could be summed up as services that provide space on a server owned or leased for use by clients, as well as providing Internet connectivity, typically in a data center. It can also provide data center space and connectivity to the Internet for other servers located in their data center.

Corporate Identity

Corporate identity design is defined as the process of building a brand image of a certain organization by promoting and communicating its corporate image through the use of its logo, business card, envelope, etc...

The image of your business or firm in the minds of customers, investors, and even employees is not something you can take for granted. At Multiframes, we develop what we call a corporate personality and constitute of color palettes, typefaces, page layouts and other such.

Video Production

Multiframes production is a multi-creative production house that caters for different channels and categories. Our creative team includes the region's best talents from renowned directors and cinematographers to top-notch producers handling projects of nearly every scale and genre.

Our extensive portfolio includes motion pictures for the region's most beloved brands and covers:

- Brand Videos
- Corporate videos
- CEO Profiles
- Web Videos
- Instructional Videos
- Educational Videos
- Industrial Videos
- Market Research Video

Multiframes in-house team manages the entire production process, which gives us the ability to ensure a consistent high caliber of work across all phases of the project's execution:

- Concept Development (Script Writing, Storyboarding)
- Casting and location Scouting
- Pre-Production and Production
- Video Editing, Visual Effects, Motion Graphics and 3D Animation
- Music Scoring and Sound Design
- Color Correction and Video Finishing

Mobile App

Users desire a mobile experience that transcends passive entertainment to include utility-based applications like mobile-optimized banking and travel planning. Your mobile is designed to surpass the laptop in so many ways. Any software of your choice can be made accessible through your mobile. Your mobile is not just an answering machine, it's an appliance which can do wonders. Whether you are at home, at work or on the go, you can have access to applications of your choice via your mobile. Imagine what you can accomplish and how much time you can spare in a world that's in a race with time.

Email Marketing Application

Email marketing is best defined at Multiframe. Email marketing is a means for individuals, companies, organizations or groups to develop and maintain effective communication with customers, contacts, subscribers or members. This process is simple and efficient as it provides an established way to manage lists of email contacts, build a professional colorful email templates and messages, schedule campaigns and track the results and actions of the user's contacts.

Web Based Applications

As the name indicates, web application development is the process and practice of developing web applications. The numerous technologies used in the process include Ajax, ASP, CSS, PHP, JavaScript, and much more.

Identifying an appropriate software development model is the first step for any project; the model is based on the project's requirements in terms of schedule, delivery, quality etc. These may be the traditional software development models or, lightweight agile software development models, involving feature-driven, responsive development. Each model is associated with a set of process procedures. These process procedures are designed to maximize benefits and reduce the risks that are inherent in any development project.

Task Management Solution

Multiframes provides a task management web based solution with a dynamic workflow that helps to improve your production & monitor your business for all enterprises. The experts on our team are PMP trained and certified, with years of experience in work management and solution implementations.

Our goal is get you up and running as quickly and efficiently as possible using latest technologies.

The responsive design became essential for the web design and development market for the Lebanese and Middle-east companies.

Multiframes provides HTML5 - responsive web design and development solutions that work on all devices: desktops, laptops, tablets, mobile phone. It is capable to animate your website, highlights your products and services, provides smooth navigation between your web pages and increases the level of interaction between your website and the visitors which should lead for an increasing of your sales.

The strength point of developing your website using HTML5- responsive design is that it makes it working on most of devices such as desktops, laptops, tablets (iPads, Samsung, etc...), mobile phone (Apple OS, Android, Windows, etc...). In addition, HTML5 allows your website to be responsive with all resolutions that makes your website fit to any screen and deliver better impression to your website visitors or clients.

E- Business Consultation

Whether you are planning to develop a business entrance or looking at a custom application, our team of experts, at Multiframes, can guide you through the setting of a strategic plan which ensures the success of your project.

We provide you with high-impact approaching, guidance, and research so you can finally take enlightened business decisions. Our consultants deliver actionable analysis and timely solutions that meet your specific needs.

Photography

A photo is worth a thousand words. It is a way of reproducing the world around us. Not only does it evoke the sense of sight, but also incites one's imagination and actuate one's memory. Photography allows you to reach a huge audience and propagate whatever idea, notion, or impression you wish. So what would better serve your website than photography? Photography can sum up your whole corporate personality as it represents the attitude of your business, its personality and aspirations. In addition, its aesthetic effect can prove your website as appealing, engaging, and emanate, and thus, promote your services and products.

Domain Registration

This is the first step of the website formation process, the domain name is a very important step for the continuity of your website.

At Multiframes we help you find and register a domain that you can use as long as your website is running, we also offer monitoring of the domain name for it not to be listed on black lists.
